

SUSTAINABILITY STREET

INDUSTRIAL CADETS ACTIVITY WORKING WITH THE
PLATINUM JUBILEE PAGEANT

YOUR CHALLENGE

It's celebration time! To commemorate the Platinum Jubilee Pageant, your local community are hosting a street party in a public space.

The problem: the party needs to be as environmentally-friendly as possible and have asked for your help! Design a poster showing your suggestions to make the event eco-friendly and sustainable.

HOW WOULD YOU MAKE THE EVENT ENVIRONMENTALLY-FRIENDLY?

Where to Start

STEP 1:

Think about and research different elements of a street party.

Consider food and drinks, venue/space, energy use, lighting, transport, waste etc. Use the [Host Your Own Local Pageant Pack](#) for some ideas!

Click here to explore events already happening near you!

STEP 3:

Begin to form a plan for your poster.

What are your main ideas? How many solutions will you propose? How could you explain them? Sketch your ideas.

STEP 2:

Find out which are the most high-carbon activities. Research environmentally friendly alternatives.

Think about different energy sources, where you are sourcing materials and services, the carbon footprint of food, re-using materials etc.

You can choose to focus on one or two detailed ideas such as transport and food, or provide several solutions!

High-carbon activities emit a lot of carbon and increase your carbon footprint while **low-carbon activities** have a smaller impact on your carbon footprint.

STEP 4:

Come up with your final design.

Create your poster. You can include:

- Details of the event and where it is held
- Your solutions with explanations
- Images to show your ideas

Working in teams?
There is a

team

USEFUL INFORMATION

Consider This:

- How will you avoid excess waste? What will happen to leftover food?
- Where will you source materials and items from? Will you buy in bulk, shop local, secondhand?
- How will people travel to the event?
- What types of energy sources can you use? How can you generate energy sustainably?
- Where do you source water? Is there rain water recycling or grey water recycling?
- Is the event accessible and inclusive?
- How will the event leave a lasting legacy?

What is Sustainability?

Meeting the needs of the present without compromising the ability of future generations to meet their own needs.

- United Nations Brundtland Commission

Sustainable Development Goals

The Sustainable Development Goals are the blueprint to achieve a better and more sustainable future for all. They address the global challenges we face, including poverty, inequality, climate change, environmental degradation, peace and justice.

PLANNING WORKSHEET

Name:

Country:

(Northern Ireland, Scotland,
England, Wales)

Elements of the event:

Which are the most high carbon elements?

-
-
-
-
-

Alternative, low-carbon ideas:

-
-
-
-

- How will you avoid excess waste? What will happen to leftover food?
- Where will you source materials and items from?
- How will people travel to the event?
- Where do you source water and food?

- What types of energy sources can you use? How can you generate energy sustainably?
- Is the event accessible and inclusive?
- How will the event leave a lasting legacy?

One thing I've learned about
sustainability is...

One thing I've learned about
teamwork is...
