Aerospace Engineering Wordsearch

Aerospace engineering explained

Aerospace engineers design everything from planes and helicopters, to satellites and drones. Two major areas of their work these days involve making air travel more environmentally friendly, and developing space tourism! What could the future hold?

How many can you find?

Hidden in the grid opposite are fifteen words related to aerospace engineering - how quickly can you find them all?

The words read horizontally, vertically, diagonally and backwards.

Challenge yourself!

Research the job roles and careers available in the aerospace sector. Which jobs exist now that didn't exist ten years ago?

What might the future hold? Take a look at some of <u>these</u> futuristic concept planes What could they be used for? Where could they go? What skills would you need to be able to design one of these?
