ENGINEERING

Engineering is varied!

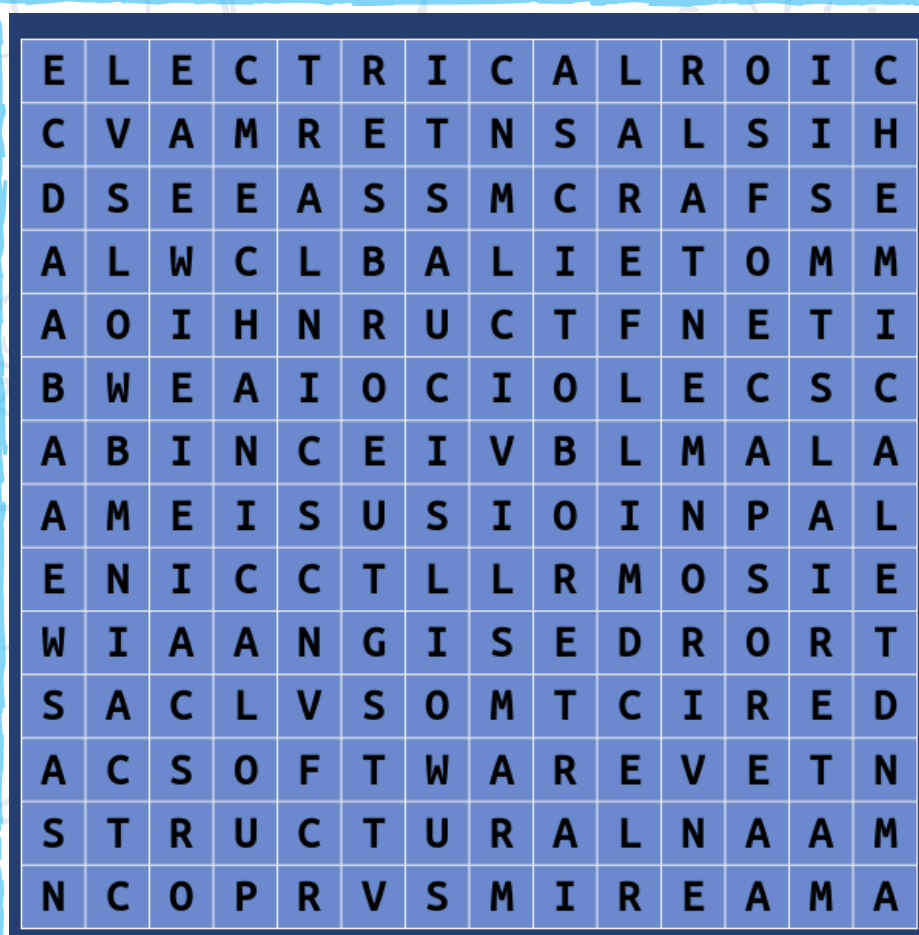

Without engineers life wouldn't exist as we know it! It's not all about fixing cars or building aeroplanes engineers work in almost every area we can imagine!

From inventions that move us, to creations that keep us safe, or thinking of better ways to protect our planet and create renewable energy!

How many can you find?

Hidden in the grid opposite are 12 different types of engineer - how quickly can you find them all? Why not challenge yourself to find out more about the different types of engineers?

The words read horizontally, vertically and diagonally.
